

Jira Administration Part 1

Cloud

8 Hours

Overview

AgileSparks is an **Atlassian Training Partner** and offers a variety of training solutions for different audiences around Atlassian products using original **Atlassian course material**.

In this course you will learn the skills you need to succeed as a Jira administrator in cloud:

- How to set up a new Jira instance for your organization
- Important Jira administrator best practices and responsibilities
- How to manage users, set permissions, and configure projects
- How to configure Jira, apply global permissions, create new projects, update workflows, and control access to your products.

The course includes hands-on practice and you will experience performing important Jira administrator tasks. Through real-world business scenarios, you'll learn tips and best practices to ensure your success as a Jira administrator.

Who Should Attend

- New Jira administrators who manage Jira Software, Jira Service Management, and/or Jira Work Management.
- Administrators working in Jira Cloud.

Prerequisites

We suggest you take the Atlassian Jira Essentials with Agile Mindset course, or have equivalent Jira experience.
